|---------------------------------------------------------------------|----|
| Overview .....                                                      | 2  |
| §1 – Introduction .....                                             | 7  |
| §1 – Introduction .....                                             | 7  |
| §1.1 – General Comments .....                                       | 7  |
| §1.2 – Game Scale .....                                             | 7  |
| §2 – Game Components .....                                          | 8  |
| §2 – Game Components .....                                          | 8  |
| §2.1 – The Game Maps .....                                          | 8  |
| §2.2 – Play Aids .....                                              | 8  |
| §2.3 – The Units .....                                              | 8  |
| §2.4 – Game Parts Inventory .....                                   | 9  |
| §2.31 – Dervish weapon types .....                                  | 9  |
| §2.32 – Anglo-Egyptian weapon types .....                           | 10 |
| §3 – Getting Started .....                                          | 12 |
| §3 – Getting Started .....                                          | 12 |
| §4 – Turn Sequence .....                                            | 13 |
| §4 – Turn Sequence .....                                            | 13 |
| §5 – Movement Phase .....                                           | 15 |
| §5 – Movement Phase (general) .....                                 | 15 |
| §5.1 – General Rules .....                                          | 15 |
| §5.2 – Movement Restrictions .....                                  | 15 |
| §5.3 – Constructing the Zariba .....                                | 15 |
| §5.4 – Zones of Control .....                                       | 16 |
| §5.5 – Stacking .....                                               | 16 |
| §5.11 – Movement allowances printed on units .....                  | 16 |
| §5.12 – Move up to allowance, hex by hex (cumulative MP cap) .....  | 18 |
| §5.13 – No MP accumulation between turns .....                      | 18 |
| §5.21 – Friendlies transport via gunboat .....                      | 19 |
| §5.22 – Land units may never enter a Nile River hex .....           | 20 |
| §5.23 – Walled city entry restrictions .....                        | 20 |
| §5.24 – Gunboat upstream/downstream movement .....                  | 21 |
| §5.25 – Dervish forts may not move .....                            | 22 |
| §5.26 – Units stop on entering enemy ZOC .....                      | 23 |
| §5.41 – All units except AE leaders exert ZOC .....                 | 23 |
| §5.42 – No MP cost to enter/leave enemy ZOC .....                   | 24 |
| §5.43 – Units stop when entering enemy ZOC .....                    | 24 |
| §5.44 – ZOC limitations (walls, khor, fort, Nile, Zariba) .....     | 25 |
| §5.51 – Stacking limit (4 units + leaders, gunboats isolated) ..... | 26 |
| §5.52 – Different Dervish tribes may not stack together .....       | 27 |
| §5.53 – Leader stacking with command colour only .....              | 28 |
| §5.54 – Anglo-Egyptian Brigade Integrity .....                      | 28 |
| §6 – Fire Combat Phase .....                                        | 30 |
| §6 – Fire Combat Phase .....                                        | 30 |
| §6.1 – General Rules .....                                          | 30 |
| §6.2 – How To Have Fire Combat .....                                | 30 |
| §6.3 – Line of Sight Table .....                                    | 30 |
| §6.4 – Fire Combat Sequence .....                                   | 32 |
| §6.5 – Special Unit Capabilities .....                              | 33 |
| §6.6 – Special Artillery Capabilities .....                         | 33 |
| §6.7 – Defensive Fire .....                                         | 33 |
| §6.8 – Offensive Fire .....                                         | 33 |
| §6.11 – Fire combat factor printed on units .....                   | 34 |
| §6.12 – Fire combat is always voluntary .....                       | 34 |
| §6.13 – Fire factor is unitary (may not be divided) .....           | 34 |
| §6.14 – Players may combine fire factors into one attack .....      | 34 |
| §6.15 – May divide a stack to fire at different hexes .....         | 35 |
| §6.16 – Halving fire strength rounds down, minimum 1 .....          | 35 |
| §6.21 – First check LOS before firing .....                         | 36 |
| §6.22 – Consult Range Effects Table .....                           | 36 |
| §6.23 – Terrain defensive modifier .....                            | 37 |

|                                                                                         |    |
|-----------------------------------------------------------------------------------------|----|
| §6.24 – Anglo-Egyptian direct fire accuracy bonus and brigade integrity .....           | 38 |
| §6.41 – Direct Fire Subphase .....                                                      | 39 |
| §6.42 – Maxim Second Fire and Howitzer Fire Subphase .....                              | 39 |
| §6.51 – Leader Units .....                                                              | 39 |
| §6.52 – Anglo-Egyptian Friendlies Brigade .....                                         | 40 |
| §6.53 – Royal Engineers demolition .....                                                | 40 |
| §6.54 – Forts .....                                                                     | 41 |
| §6.61 – Only artillery may fire at gunboats; 3+ to sink .....                           | 42 |
| §6.62 – Only artillery may fire at forts; 2+ to destroy .....                           | 43 |
| §6.63 – Only artillery may breach wall hexsides; 2+ required .....                      | 43 |
| §6.64 – Howitzer fire .....                                                             | 44 |
| §6.81 – Moving player may fire with all capable units .....                             | 45 |
| §6.82 – Advance after combat (offensive fire) .....                                     | 45 |
| §7 – Melee Phase .....                                                                  | 47 |
| §7 – Melee Phase (chapter) .....                                                        | 47 |
| §7.1 – Melee strength printed on counter .....                                          | 47 |
| §7.2 – Melee adjacent only, not across wall hexsides .....                              | 47 |
| §7.3 – Simultaneous melee combat .....                                                  | 48 |
| §7.4 – Who may melee attack / defend .....                                              | 48 |
| §7.5 – Cavalry/camel retreat before melee .....                                         | 49 |
| §7.6 – Advance after melee .....                                                        | 50 |
| §7.7 – Melee modifiers .....                                                            | 51 |
| §8 – Night Game Turns .....                                                             | 53 |
| §8 – Night Game Turns .....                                                             | 53 |
| §8.1 – Night effects .....                                                              | 53 |
| §8.2 – Dervish Desertion Roll .....                                                     | 54 |
| §9 – The Scenarios .....                                                                | 56 |
| §9 – The Scenarios .....                                                                | 56 |
| §9.1 – The Campaign Game .....                                                          | 56 |
| §9.2 – The Historical Scenario .....                                                    | 56 |
| §9.3 – Bonus Game: Fall of Khartoum .....                                               | 56 |
| §9.11 – Set Up (Campaign) .....                                                         | 56 |
| §9.12 – Scenario Length (Campaign) .....                                                | 56 |
| §9.13 – Special Rules (Campaign) .....                                                  | 57 |
| §9.14 – Victory Conditions (Campaign) .....                                             | 57 |
| §9.21 – Set Up (Historical) .....                                                       | 59 |
| §9.22 – Scenario Length (Historical) .....                                              | 59 |
| §9.23 – Special Rule: The Zariba .....                                                  | 59 |
| §9.24 – Victory Conditions (Historical) .....                                           | 60 |
| §9.31 – Bonus game map .....                                                            | 60 |
| §9.32 – Set Up (Bonus) .....                                                            | 61 |
| §9.33 – Scenario Length (Bonus) .....                                                   | 61 |
| §9.34 – Special Rules (Bonus) .....                                                     | 61 |
| §9.35 – Victory Conditions (Bonus) .....                                                | 61 |
| §9.111 – Dervish set up (Campaign) .....                                                | 62 |
| §9.112 – Dervish reinforcements (Campaign) .....                                        | 62 |
| §9.113 – Anglo-Egyptian reinforcements (Campaign) .....                                 | 63 |
| §9.211 – Anglo-Egyptian set up first, moves second (Historical) .....                   | 64 |
| §9.212 – Dervish set up (Historical) – deployment zones and leader-to-hex mapping ..... | 65 |
| §9.231 – Thorn hedge hexsides .....                                                     | 65 |
| §9.232 – Trench hexsides .....                                                          | 66 |
| §9.233 – Zariba entry/exit costs .....                                                  | 66 |
| §9.321 – British set up (Bonus) .....                                                   | 67 |
| §9.322 – Dervish enters turn one (Bonus) .....                                          | 68 |
| §9.341 – Turn 1 is always a night turn (Bonus) .....                                    | 68 |
| §9.342 – All hexes are playable, including half hexes (Bonus) .....                     | 69 |
| §9.343 – Both players use the Dervish Range Effects Table (Bonus) .....                 | 69 |
| §9.344 – Dervish controls the North Fort (Bonus) .....                                  | 69 |
| §9.345 – Gunboat White Nile <-> Blue Nile crossing (Bonus) .....                        | 70 |
| §9.346 – GORDON immobile, eliminated only at the Palace (Bonus) .....                   | 70 |
| §10 – Optional Rules .....                                                              | 72 |
| §10 – Optional Rules .....                                                              | 72 |
| §10.1 – River Mines .....                                                               | 72 |

|                                                                         |    |
|-------------------------------------------------------------------------|----|
| §10.2 – River Chain .....                                               | 72 |
| §10.11 – Secretly record mine hexes .....                               | 72 |
| §10.12 – Mine resolution .....                                          | 73 |
| §10.13 – Mines consumed after both rolled for .....                     | 73 |
| §10.14 – Dervish gunboats pass safely .....                             | 74 |

## §1 – Introduction

**descriptive**  
manual page unknown

### Introduction

## §1.1 – General Comments

**implemented**  
manual page 1

General Comments

“REMEMBER GORDON!” — THE BATTLE OF OMDURMAN is a simulation of the final battle in Great Britain’s two-year campaign to reassert her presence in the Sudan (1896–1898). Fought September 2nd, 1898, Omdurman finally broke the back of the fanatical Dervish rebellion and gained Britain a million square miles of desolate territory and two million impoverished subjects. With two players, one assumes the role of Herbert Kitchener, Sirdar (CIC) of the Anglo-Egyptian army; the other player becomes the Khalifa, Abdullah the Taiasha, absolute ruler of the Dervishes. The game is also suited for multi-player participation, with each player assuming command of one or more Dervish tribes or Anglo-Egyptian brigades.

While “REMEMBER GORDON!” — THE BATTLE OF OMDURMAN is not, strictly speaking, a beginner’s game, the mechanics of play should be familiar to players of modest experience. It is suggested that the bonus game, FALL OF KHARTOUM, and the historical scenario be played first to familiarize players with the game system prior

## §1.2 – Game Scale

**descriptive**  
manual page unknown

Game Scale

Each hexagon of the mapsheet represents approximately 400–440 yards of real terrain and each day turn is the equivalent of two hours of real time. Each counter of infantry and cavalry represents between 400 and 700 men, and each of the gunboats present at the battle has its own counter. The upper echelon of command is represented by individual leader counters for the Anglo-Egyptian force; and leaders plus their retinues for the Dervish army.

## §2 – Game Components

### §2 – Game Components

descriptive

manual page unknown

#### Game Components

### §2.1 – The Game Maps

descriptive

manual page unknown

#### The Game Maps

The Omdurman battle map represents approximately 100 square miles of real territory and includes the area north of Omdurman in which the historical battle took place as well as the dominant terrain features that influenced the course of the battle. Note that the mapsheet also contains the Turn Record Track, Turn Sequence, and Terrain Effects Chart at the top; and the Combat Tables and Howitzer Fire Scattergram in the lower right corner. The large letters “A”, “D”, “Y”, etc. are set-up hexes for the historical scenario only (9.2) and should be ignored in the campaign game. Similarly, the hexsides of the Zariba exist only in the historical scenario and should be considered clear terrain in the campaign game. Note, however, that the Anglo-Egyptian player may “construct” the Zariba in the campaign game if desired (see 5.3). All full hexes of the Omdurman game map are playable, including the seven hexes of the Howitzer Fire Scattergram.

The mini-map for the bonus game, FALL OF KHARTOUM, represents that city as it appeared in 1885. The portion (see manual for full text)

See also: §5.3, §9.2

### §2.2 – Play Aids

descriptive

manual page unknown

#### Play Aids

Certain charts and tables are needed to play the game. The Terrain Effects Chart lists all terrain found on the mapsheet and the effect of each type on movement and combat. The Combat Tables describe the range effects on various weapon types and includes the Combat Results Table. Also note the Line of Sight Table on the back of this rulebook. It tells players when certain terrain types block line of sight, thus preventing direct fire attacks on enemy units. Players should become familiar with these various charts and tables prior to the beginning of play.

(see manual for full text)

### §2.3 – The Units

implemented

## §2.4 – Game Parts Inventory

out-of-scope

manual page unknown

### Game Parts Inventory

Your complete copy of “REMEMBER GORDON!” — THE BATTLE OF OMDURMAN includes:

- One 22 × 28 Battle of Omdurman mapsheet
- One 8½ × 11 bonus game: FALL OF KHARTOUM mapsheet
- One Rules Booklet
- One die-cut Unit Counter Sheet
- One Campaign Game Order of Appearance Card
- One ten-sided die
- One game box

## §2.31 – Dervish weapon types

implemented

manual page unknown

Dervish artillery, gunboats, and forts fire on the “artillery” line of the Dervish Range Effects Table; Jehadia and Danagla units fire on the “rifles” line as does the Isa Zachneih unit. All other Dervish units (including leaders) are armed with spears and swords.

## §2.32 – Anglo-Egyptian weapon types

**implemented**

manual page unknown

All Anglo-Egyptian units (except gunboats, Maxims, artillery, and leaders) are armed with rifles. Maxims fire on the “Maxims” line of the Anglo-Egyptian Range Effects Table, and artillery and old gunboats fire on the “Artillery” line. New type (named) gunboats may fire on the “Howitzer”, “Artillery”, and “Maxims” lines of the Range Effects Table. (See 6.52 for the fire capabilities of the “Friendlies”).

**\*\*Sample Dervish Units\*\*** (printed on counters): combat unit (Combat / Melee / Movement values, plus Tribe identifier); Leader (e.g. OSMAN DIGNA); Camel unit (e.g. Danagla, 4-6-12); Fort.

**\*\*Sample Anglo-Egyptian Units\*\*** (printed on counters): Cavalry (e.g. 21 Lancers); Artillery (e.g. 32 Battery); Old Gunboat (e.g. LORD KITCHENER, 0-0-15); New Gunboat — named (e.g. Sultan, with artillery and howitzer factor, plus movement downstream / movement upstream values); Maxim Guns (fire twice per turn); Infantry (Fire Combat Factor / Melee / Movement, plus Battalion ID and Brigade ID — e.g. “2B” = 2nd British Brigade, “3E” = 3rd Egyptian Brigade).

## | §3 – Getting Started

### §3 – Getting Started

out-of-scope

manual page unknown

#### Getting Started

Spread out the mapsheet on a table. It should lie flat if you backfold it against the scored lines. The Dervish player should sit next to the west edge of the map and the Anglo-Egyptian player opposite him on the east edge. Read through the rules once, looking over the various charts as they are referred to in the various sections. Next, select a scenario and punch out only those unit counters needed to play. Later on, the rest of the unit counters should be punched out, sorted and stored by unit type.

(see manual for full text)

■ 1/1 implemented

## §4 – Turn Sequence

### §4 – Turn Sequence

implemented

manual page unknown

#### Turn Sequence

“REMEMBER GORDON!” — THE BATTLE OF OMDURMAN is played in “Game Turns”, each of which has two “Player Turns”. The player moving first will vary according to the scenario being played. In the Campaign Game, for example, the Anglo-Egyptian player moves first.

### A) Anglo-Egyptian Player Turn:

1. Anglo-Egyptian Movement Phase
2. Fire Combat Phase a. Dervish Defensive Fire b. Anglo-Egyptian Offensive Fire
  1. Direct Fire Subphase
  2. Maxim Second Fire and Howitzer Fire Subphase

(see manual for full text)

implemented

manual page unknown

#### Constructing the Zariba

The Zariba trench and thorn hedge hexsides are built and in place in the historical scenario only. These hexsides are considered clear terrain in the campaign game. The Anglo-Egyptian player may, however, find it useful to construct this defensive position during the campaign game. The Zariba hexsides may only be built in their position as displayed on the mapsheet. Construction procedure is as follows: any Anglo-Egyptian infantry unit that begins and ends the Anglo-Egyptian player turn adjacent to (and on the Nile side of) Zariba hexsides has constructed all Zariba hexsides to which he is adjacent. The constructing unit may neither fire offensively nor melee attack during the turn of construction. Use a blank counter to denote units constructing Zariba hexsides. See 9.23 for defensive benefits and movement restrictions of Zariba hexsides.

### Stacking

## §5.11 – Movement allowances printed on units

[implemented](#)

manual page unknown

The movement allowances of the various unit types are printed directly on the units (see 2.3). A unit may move up to this printed movement allowance, paying varying costs for different terrain types (see the Terrain Effects Chart).

## §5.12 – Move up to allowance, hex by hex (cumulative MP cap)

implemented

manual page unknown

A player may move as many or as few of his units as desired during each movement phase, limited only by the units' movement allowance, the terrain costs paid in moving from hex to hex, and enemy zones of control (see 5.4).

See also: §5.4

## §5.13 – No MP accumulation between turns

implemented

manual page unknown

A unit may never accumulate movement points from turn to turn, nor may a unit transfer unused movement points to other units. A unit's unused movement points in any given turn are considered lost.

| File                                                                                                        | Symbol                 | Code Snippet                                                                                                                                                                                                                                                                                                    |

## §5.21 – Friendlies transport via gunboat

implemented

manual page unknown

In general, naval transport missions are not allowed, i.e. gunboats may not carry any land units. The sole exception is that the Anglo-Egyptian player may transport the surviving units of the “Friendlies” brigade from the east bank of the Nile to the west bank after, and only after, the Dervish east bank unit (Isa Zachneih) has been eliminated. The transport is accomplished in the following sequence: a) on any turn that a “Friendlies” unit and any Anglo-Egyptian gunboat start their turn adjacent, that unit may load onto (i.e. stack with) the gunboat; b) during the Anglo-Egyptian player’s next turn the gunboat may move to any Nile hex adjacent to a west bank hex (up to the gunboat’s movement allowance); c) on the Anglo-Egyptian player’s third turn the “Friendlies” unit may disembark and move normally, paying the normal terrain cost for the first hex entered. The gunboat may also move normally that turn.

(see manual for full text)

## §5.22 – Land units may never enter a Nile River hex

implemented

manual page unknown

With the exception of 5.21, land units may never enter a Nile River hex. Only gunboats may enter and move along Nile River hexes.

## §5.23 – Walled city entry restrictions

implemented

manual page unknown

Only certain units may enter the walled portion of Omdurman. For the Dervish player these are the Khalifa unit, the three Dervish artillery units, and the Taiasha units (the Khalifa's bodyguard). Any Anglo-Egyptian units that can get to the walled city may enter it (except gunboats and "Friendlies"). Units entering and/or exiting the walled city may only do so through a gate or breach hexside.

## §5.24 – Gunboat upstream/downstream movement

implemented

manual page unknown

Note that gunboats have two movement allowances separated by a slash, e.g. 10/16. The smaller number is the movement allowance when moving upstream, i.e. against the current (the direction of the current is indicated by arrows in the Nile). The larger number is the movement allowance when moving downstream, i.e. with the current.

Gunboats may combine movement in both directions, but if they move even one hex upstream, their upstream movement allowance is their maximum movement allowance for that turn, and may not be exceeded.

(see manual for full text)

## §5.41 – All units except AE leaders exert ZOC

implemented

manual page unknown

All units except Anglo-Egyptian leaders exert a zone of control (hereafter called a ZOC) into their six adjacent hexes (exception: Gunboats exert a ZOC only against enemy gunboats). Disrupted units have no ZOC.

| File                                                                                                                    | Symbol                              | Code Snippet                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## §5.44 – ZOC limitations (walls, khor, fort, Nile, Zariba)

**implemented**

manual page unknown

ZOCs do not extend into or out of a Nile River hex (exception: Gunboats, see 5.41). ZOCs do not extend across a khor, into a fort, or into a hex inside the walled city across a wall hexside. ZOCs do extend out of a fort (even if unoccupied), and from a walled city hex into an adjacent non-walled-city hex across a wall hexside. ZOCs also extend out of (but not into) a walled city hex across a gate hexside. ZOCs extend both ways across a breach hexside. ZOCs also extend out of, but not into, a hut or building hex. In the historical scenario ZOCs extend out of, but not into, the Zariba across a Zariba hexside (also in the campaign game if the Zariba is constructed).

(see manual for full text)

## §5.51 – Stacking limit (4 units + leaders, gunboats isolated)

**implemented**

manual page unknown

No more than four units may occupy a hex, with the exception of leaders and gunboats. All leader units are free stacking, i.e. they may stack in addition to the four-unit-per-hex stacking limitation. Gunboats may not stack with any other unit (Exception: 5.21). Players may move through friendly units at no additional cost in movement points. The stacking limitation applies only at the end of the movement phase and during combat.

## §5.52 – Different Dervish tribes may not stack together

implemented

manual page unknown

The units of different Dervish tribes may not stack together, even if they are the same color (e.g. although both are green, Mulazmin and Jehadia units may not stack with each other).

| File                                                           | Symbol                 | Code Snippet                                                                                                                                                                                                                                                      |

## §5.53 – Leader stacking with command colour only

implemented

manual page unknown

Leader units are not required to stack. If Dervish leaders elect to stack, however, they may only stack with units of their command (i.e. color). For example, Sheik El Din may only stack with Mulazmins or Jehadias.

**\*\*5.54) Anglo-Egyptian Brigade Integrity:\*\*** All British, Sudanese, and Egyptian infantry units have their brigade designation printed in the upper right corner (e.g. “2B” = 2nd British Brigade; “3E” = 3rd Egyptian Brigade, etc.). In any combat phase in which all four infantry battalions belonging to any Anglo-Egyptian infantry brigade are stacked in the same hex they are said to have brigade integrity. Stacks having brigade integrity receive a +1 modifier to their fire combat die roll provided they all fire at the same enemy occupied hex. This modifier is in addition to the normal +1 bonus given to all Anglo-Egyptian direct fire attacks (see 6.24).

Line of Sight Table

This table is located on the back of this rulebook and should be self-explanatory. Locate the terrain type the firing unit is in and cross-index it with the terrain type the target unit is in. Terrain types in the intersecting box block line of sight, with exceptions as footnoted. Also study the “Special LOS Notes” given and remember that (with the exception of howitzer fire — see 6.64) you can’t fire at anything you can’t see!

## §6.4 – Fire Combat Sequence

implemented

manual page unknown

### Fire Combat Sequence

The sequence of fire combat resolution is the same for both defensive and offensive fire combat. During the Dervish player turn the Anglo-Egyptian player executes 6.41 AND 6.42 as defensive fire, after which the Dervish player executes 6.41 as offensive fire. During the Anglo-Egyptian player turn the Dervish player executes 6.41 as defensive fire, after which the Anglo-Egyptian player executes 6.41 AND 6.42 as offensive fire.

**\*\*6.41) Direct Fire Subphase (Dervish and Anglo-Egyptian players):\*\*** The firing player must first allocate all of his fire attacks, combining his units’ direct fire combat factors in any manner he wishes. After all fire has been allocated, the firing player then resolves his attacks in any order he wishes.

**\*\*6.42) Maxim Second Fire and Howitzer Fire Subphase (Anglo-Egyptian player only):\*\*** Anglo-Egyptian named gunboats may now fire their artillery factor as howitzer fire (see 6.64) and all Maxim guns may fire a second time. Once

§6.5 – Special Unit Capabilities

descriptive  
manual page unknown

Special Unit Capabilities

**\*\*6.51) Leader Units:\*\*** Dervish leader units have a fire factor, a melee factor, and a movement factor. They may thus attack, melee, and be eliminated like any other combat unit. Their special benefit is that they stack free.

Anglo-Egyptian leaders have a movement factor only. They are eliminated if a) they are alone in a hex when a Dervish unit occupies or passes through that hex, or b) if all of the combat units a leader is stacked with are eliminated in fire combat or melee. The special function of Anglo-Egyptian leaders is that at least one must survive to occupy the Mahdi’s tomb hex if it is to be taken from the Dervish player (see 9.14).

**\*\*6.52) Anglo-Egyptian “Friendlies” Brigade:\*\*** These units represent native volunteers in the Anglo-Egyptian army. They fire rifles on the Dervish Range Effects Table and melee with the Dervish melee modifier. They may not enter the walled city of Omdurman (see 5.23). They may be transferred to the west bank (see 5.21).

Special Artillery Capabilities

§6.7 – Defensive Fire

implemented  
manual page unknown

Defensive Fire

In Defensive Fire phase, all of the non-moving player’s units may fire at any of the moving player’s units in range, within the limitations imposed by the rules of combat (see 6.1 to 6.6). There is no advance after combat as a result of defensive fires.

§6.8 – Offensive Fire

descriptive  
manual page unknown

Offensive Fire

## §6.11 – Fire combat factor printed on units

implemented

manual page unknown

The fire combat factor of the various unit types is printed directly on the units and is a numerical expression of the unit's fire strength.

| File                                                                                    | Symbol            | Code Snippet                                                                                                                                                                                                                                                |

implicit

manual page unknown

Fire combat is always voluntary. A unit is never required to fire at enemy units merely because they are in range or adjacent.

## §6.13 – Fire factor is unitary (may not be divided)

implemented

manual page unknown

If a unit elects to fire, its fire combat factor at an enemy unit, that fire combat factor is unitary. A unit's fire combat factor may not be divided up to fire at enemy units on different hexes.

| File                                                                                                | Symbol                        | Code Snippet                                                                                                                                                                                                                                     |

## §6.14 – Players may combine fire factors into one attack

implemented

manual page unknown

Players may combine fire during fire combat phase, i.e. they may fire at an enemy-occupied hex with as many friendly units as may legally do so, combining all of their fire combat factors into one attack. Note that in any given fire combat phase, however, a combat unit may only fire once and may only be fired at once (exceptions: Maxim guns and gunboats — see 6.4).

## §6.15 – May divide a stack to fire at different hexes

**implemented**

manual page unknown

Players may also divide a stack of units in order to fire at different enemy-occupied hexes. Anglo-Egyptian infantry units having brigade integrity, however, do not receive their +1 direct fire modifier unless they all fire at the same enemy-occupied hex (see 5.54).

## §6.16 – Halving fire strength rounds down, minimum 1

**implemented**

manual page unknown

When halving fire combat strength, always round down each individual unit. For example, an Egyptian brigade of four battalions, each having a printed strength of 9 fire factors, will fire a total of 16 factors when halved. However, a unit's firing strength is never reduced below one by halving.

| File                                | Symbol           | Code Snippet                                                                                                               |

## §6.21 – First check LOS before firing

[implemented](#)

manual page unknown

When combat units wish to fire at enemy units, first check the Line of Sight Table to be sure the firing unit can see the target hex (exception: howitzer fire, see 6.64).

See also: §6.64

## §6.22 – Consult Range Effects Table

[implemented](#)

manual page unknown

Next consult the Range Effects Table to see if the firing unit's fire combat factor is tripled, doubled, normal, halved, or if the target hex is out of range. Add up the total number of fire combat factors firing at the enemy-occupied hex.

| File                                                                                                | Symbol                                | Code Snippet                                                                                                                                                                                                                                                                                                     |

## §6.23 – Terrain defensive modifier

**implemented**

manual page unknown

Next check the Terrain Effects Chart to see if the enemy-occupied hex fired upon contains any terrain which gives the enemy units in that hex a defensive benefit. If so, apply this negative modifier to the roll of the ten-sided die and cross-index your net die roll on the Combat Results Table with the number of combat factors firing.

## §6.24 – Anglo-Egyptian direct fire accuracy bonus and brigade integrity

**implemented**

manual page unknown

All Anglo-Egyptian direct fire attacks receive a +1 modifier to their die roll as an accuracy bonus. In addition, any stack of Anglo-Egyptian infantry having brigade integrity (see 5.54) receives a +1 modifier to their die roll if all four fire at the same enemy-occupied hex. These modifiers are cumulative.

See also: §5.54

## §6.62 – Only artillery may fire at forts; 2+ to destroy

implemented

manual page unknown

Only artillery may fire at forts. A result of 2 or more on the combat results table is required to eliminate a fort. Any other result is a miss. If the fort contains any enemy units at the instant it is destroyed, one unit is eliminated with the fort.

| File                                                                                                          | Symbol                        | Code Snippet                                                                                                                                                                                                                                      |

## §6.63 – Only artillery may breach wall hexsides; 2+ required

implemented

manual page unknown

Only artillery may fire to breach a wall hexside of Khartoum or the walled city of Omdurman. A result of 2 or more on the combat results table is required to breach a wall. Any other result is a miss. The effect of the breach is to negate the wall hexside for line of sight purposes. Place a “BREACH” marker in an adjacent hex so that the arrow points to the breached hexside. If any enemy units are adjacent to the wall hexside at the instant it is breached, one enemy unit is eliminated.

**\*\*6.64) Howitzer fire:\*\*** Five units in the game have howitzer fire capability. These are the five named British gunboats. They may fire their artillery factor as direct fire during the Direct Fire Subphase (see 4 and 6.41) and may then fire the same artillery factor as howitzer fire during the Maxim Second Fire and Howitzer Subphase (see 4 and 6.42). Exception: no howitzer fire is allowed during night game turns. To fire howitzer fire, select any target hex between 4 and 10 hexes from the firing gunboat (ignoring the Line of Sight Table) and roll the ten-sided die twice. The first die roll is the Combat Results Table die roll and the second roll is the impact hex die roll. Refer to the Howitzer Fire Subphase on the manual for the impact hex. The designated target hex is hit on a roll of 7-10. Once a howitzer

## §6.81 – Moving player may fire with all capable units

**implicit**

manual page unknown

During Offensive Fire phase, the moving player may fire with all of his units capable of firing, up to their maximum range, within the limitations imposed by the rules of combat.

## §6.82 – Advance after combat (offensive fire)

**implemented**

manual page unknown

If an enemy-occupied hex is vacated as a result of offensive fire, friendly units may advance after combat into the vacated hex. To be eligible to advance, the friendly units must have participated in the attack and must have been adjacent to the vacated hex. Note that artillery may not advance, nor may units advance across a wall hexside (except at a gate or breach). Units may never advance after combat across a khor.

## §7 – Melee Phase

### §7 – Melee Phase (chapter)

descriptive

manual page unknown

Melee Phase

### §7.1 – Melee strength printed on counter

implemented

manual page unknown

The melee strength of all units is printed on the counter. Note that gunboats have no melee strength. Gunboats may neither melee attack nor be melee attacked.

| File                                                                                    | Symbol                       | Code Snippet                                                                                                                                                                                                                                                                  |

### §7.2 – Melee adjacent only, not across wall hexsides

implemented

manual page unknown

Melee simulates the hand-to-hand fighting of the period. Units may melee attack adjacent enemy units only. Units may not melee attack across a wall hexside, but may melee attack through a gate or breach hexside.

## §7.3 – Simultaneous melee combat

**implemented**

manual page unknown

Melee combat is considered simultaneous, so that units eliminated by melee attacks still get a melee combat die roll.

| File                                                                                    | Symbol                    | Code Snippet                                                                                                                                                                                                                                                                            |

## §7.4 – Who may melee attack / defend

**implemented**

manual page unknown

Only infantry, cavalry, camel units, and Dervish leaders may melee attack. All units (except gunboats — see 7.1) may melee defend.

See also: §7.1

## §7.5 – Cavalry/camel retreat before melee

**implemented**

manual page unknown

Cavalry and camel units may retreat two hexes from an infantry melee attack. Note, however, that only one retreat per unit per turn is permitted. Thus, if their retreat places them adjacent to enemy units whose melee attacks have not yet been resolved, those enemy units may elect to attack the retreating unit(s).

| File                                                                                                      | Symbol                            | Code Snippet                                                                                                                                                                                                                                                                    |

## §7.6 – Advance after melee

**implemented**

manual page unknown

If a melee attack eliminates all of the defenders in an adjacent hex, the Dervish player **MUST** advance into the vacated hex. To be eligible to advance, the Dervish units must have been adjacent to the vacated hex and participated in the melee attack that eliminated the defenders. All surviving eligible Dervish units **MUST** advance, up to the stacking limit. The Anglo-Egyptian player may advance if desired. Note that only attacking units may advance.

## §7.7 – Melee modifiers

implemented

manual page unknown

To resolve melee, both the attacker and the defender roll on the Combat Results Table and apply the applicable melee modifier to their die roll. The Dervish player receives a +2 melee modifier, the Anglo-Egyptian player receives a +1 melee modifier. No terrain modifiers are applied to melee combat (Exception: Zariba hexsides in the historical scenario and the campaign game, if constructed — see 9.23). Melee losses must be taken from meleeing units first!

## §8 – Night Game Turns

### §8 – Night Game Turns

descriptive

manual page unknown

#### Night Game Turns

### §8.1 – Night effects

implemented

manual page unknown

The effects of night game turns are: a) all Anglo-Egyptian movement allowances are halved (round down), b) there is no Anglo-Egyptian howitzer fire, and c) all fire ranges are halved for both sides (round down, but range 1 stays range 1). Range effects on fire combat are the same as during day game turns. For example, an Anglo-Egyptian infantry unit firing at night will be doubled at range 1, normal at range 2, and may not fire at range 3 or greater.

**\*\*8.2) Dervish Desertion Roll:\*\*** Once each campaign game, during the first night turn of the game, the Dervish player rolls one die to see how many of his units desert. The roll is made during the movement phase and the number of deserting Dervish units is equal to 1½ times the roll of one die. The Dervish player may choose which units desert by merely removing them from the mapsheet. The KHALIFA unit, gunboats, artillery units, and forts are the only Dervish units that may not be chosen. No victory points are awarded to the Anglo-Egyptian player for deserting Dervishes.

The Historical Scenario

Players should note that the historical scenario is an exercise in futility for the Dervish player. It is, however, an interesting demonstration of the absolute imbecility of the Khalifa’s generalship and vividly shows the superiority of entrenched firepower over traditional tribal arms in the colonial period.

§9.13 – Special Rules (Campaign)

descriptive  
manual page unknown

- Special Rules
- None.

§9.14 – Victory Conditions (Campaign)

implemented  
manual page unknown

Victory Conditions

The Mahdi’s Tomb in Omdurman was not only the tallest structure in the entire Sudan in 1898, it was also a Dervish holy shrine. Its loss or destruction would be a severe blow to the Mahdist cause. It is accordingly assigned 25 victory points which are awarded to the player who controls it at the conclusion of play. The Dervish player controls it at the start of play. As a tactical note, the Anglo-Egyptian player will find a decisive victory almost impossible unless he takes the Mahdi’s Tomb from the Dervish player. To take the Tomb hex, it must be occupied by one British leader plus any one non-“Friendlies” Anglo-Egyptian combat unit (both undisrupted) at the conclusion of play.

Additional victory points are awarded as follows:

**\*\*Dervish Player receives:\*\***

- 10 pts: each British leader eliminated

(see manual for full text)

## §9.23 – Special Rule: The Zariba

[descriptive](#)  
manual page unknown

### Special Rule: “The Zariba”

\*\*9.231) Thorn hedge hexsides:\*\* –2 to die roll on all Dervish fire attacks; may not melee across in either direction; may not advance after combat across in either direction.

\*\*9.232) Trench hexsides:\*\* –4 to die roll on all Dervish fire attacks vs. entrenched units only; –2 (instead of +2) melee modifier to Dervish units melee attacking an entrenched unit; entrenched units may be fired “over” in both directions (i.e. they do not block line of sight); units are considered “entrenched” if they are directly adjacent to (and on the Nile River side of) a trench hexside.

(see manual for full text)

See also: §9.231, §9.232

## §9.24 – Victory Conditions (Historical)

implemented

manual page unknown

### Victory Conditions

Victory Levels are based solely on eliminating enemy units while conserving your own force as much as possible.

| Victory Level | Anglo-Egyptian Player (Dervish units eliminated) | Dervish Player (Anglo-Egyptian units eliminated)  
| |—|—|—| | 5 — DECISIVE | 100+ | 30+ | | 4 — STRATEGIC | 60–99 | 15–29 | | 3 — TACTICAL | 45–59 | 10–14 | | 2 — MARGINAL | 30–44 | 5–9 | | 1 — DRAW | 0–29 | 0–4 |

The lower value victory level is then subtracted from the higher level to determine a player’s net victory. For example, if the Anglo-Egyptian player eliminates 104 Dervish units (decisive victory) but loses 18 units doing it (Dervish Strategic), the Anglo-Egyptian player only nets out with a draw (decisive worth 5 minus strategic worth 4 = 1, draw).

(see manual for full text)

| File                                                                                      | Symbol                        | Code Snippet                                                                                                                                                                                                 |

§9.34 – Special Rules (Bonus)

`descriptive`  
manual page unknown

Special Rules

§9.35 – Victory Conditions (Bonus)

`implemented`  
manual page unknown

Victory Conditions

Victory is determined by how many turns it takes the Dervish player to eliminate the GORDON leader unit and how many Dervish units are eliminated:

- Dervish decisive: eliminate GORDON turn four or sooner.
- Dervish tactical: eliminate GORDON turn five.
- Dervish marginal: eliminate GORDON turn six.

- British marginal: GORDON survives end of turn six.
- British tactical: GORDON survives end of turn seven.
- British decisive: GORDON survives end of turn eight

(see manual for full text)

## §9.111 – Dervish set up (Campaign)

**implemented**

manual page unknown

Dervish player sets up first, moves second.

- Isa Zachneih infantry unit: anywhere on the east bank, in or south of El Debeba.
- KHALIFA ABDULLAH: in the walled city of Omdurman, in either palace hex.
- 3 artillery units, and all Taiasha units: anywhere in the walled city of Omdurman.
- 17 forts: anywhere on the mapsheet south of the Khor Shambat on the west bank, and/or south of all Halfaya hut hexes on the east bank and Nile River islands.
- 2 gunboats: any south edge Nile River hexes.

**\*\*9.112) Dervish reinforcements:\*\*** all reinforcements enter on the west edge of the mapsheet, south of the Khor Shambat. Each unit pays the terrain cost of the hex through which it enters, no matter how many units enter through

## §9.113 – Anglo-Egyptian reinforcements (Campaign)

**implemented**

manual page unknown

The Anglo-Egyptian player moves first. There are no Anglo-Egyptian units on the mapsheet at start. The GORDON unit is not used in this scenario.

- The leader units KITCHENER, GATACRE, and HUNTER may enter anytime during the first four game turns and do not count against the 12 units per turn limit. All three leaders must be in play by the end of turn four!
- All gunboats enter through any north edge Nile River hex, paying one movement point for the first hex entered. The “Friendlies” brigade enters through the Abu Alim hut hex on the east bank, paying eight movement points per unit. All other Anglo-Egyptian units enter through the west bank “ANGLO-EGYPTIAN ENTRANCE AREA”, each unit paying one movement point to enter the mapsheet.
- Turn 1) Any three gunboats; “Friendlies” brigade; Egyptian Cavalry; Horse Artillery; and two infantry brigades

(see manual for full text)

## §9.211 – Anglo-Egyptian set up first, moves second (Historical)

implemented

manual page unknown

The Anglo-Egyptian player sets up first, and moves second:

- Not in play: GORDON leader unit, “Friendlies” brigade.
- Gunboats start in any Nile River hexes adjacent to the Zariba.
- Camel Corps, Egyptian Cavalry, and Horse Artillery start in the village of Kerreri hut hexes.
- All remaining Anglo-Egyptian units set up in the 13 hexes of the Zariba.

| File                                                                                                        | Symbol              | Code Snippet                                                                                                                                                                                                                                                |

## §9.212 – Dervish set up (Historical) – deployment zones and leader-to-hex mapping

implemented

manual page unknown

The Dervish player sets up second, and moves first.

- Not in play: Isa Zachneih, gunboats, and forts.
- All Dervish units must be set up out of the line of sight of all Anglo-Egyptian units.
- Dervish leaders start on the lettered hexes:
  - A: Ali Wad Helu
  - D: Sheik El Din
  - Y: Yakub
  - K: Khalifa Abdullah
  - S: Sherif
  - O: Osman Digna

"A" is the hex of the Dervish player's starting position. "D" is the hex of the Dervish player's starting position. "Y" is the hex of the Dervish player's starting position. "K" is the hex of the Dervish player's starting position. "S" is the hex of the Dervish player's starting position. "O" is the hex of the Dervish player's starting position. (see manual for full text)

## §9.233 – Zariba entry/exit costs

**implemented**

manual page unknown

Units may only enter and/or leave the Zariba via the two end hexsides that connect to the Nile River, paying +2 movement points to cross (Exception: advance after combat across an entrenched hexside).

## §9.321 – British set up (Bonus)

[implemented](#)

manual page unknown

The British player sets up first, moves second:

- General GORDON leader unit in the palace.
- Two old style (unnamed) gunboats in any Nile River hexes.
- Set up in any building or hut hexes of Khartoum, Forts Makran and/or Buri, and/or adjacent to any wall hex:
  - one Egyptian Battalion artillery unit
  - two British infantry units (represents Caucasian troops)
  - three Egyptian infantry units (represents Cairo “Bazouks”)
  - four Sudan infantry units (represents Sudanese blacks)
  - four “Friendlies” units (represents the Shaggyeh)

(see manual for full text)

## §9.322 – Dervish enters turn one (Bonus)

implemented

manual page unknown

Dervish player moves first: enters turn one through any hexes on the south or east edge of the map.

- 32 Mulazmin units (represents combined forces of Wad El Nejumi, Abu Girgeh, and Sheik El Obeid)
- 2 Hadendowa; 6 Kehena; 5 Degheim (represents Mahdi's combined west bank forces)
- 3 Dervish artillery units.

## §10 – Optional Rules

### §10 – Optional Rules

descriptive

manual page unknown

Optional Rules (Campaign game only)

It is suggested that the most intriguing employment of the following two options is to permit the Dervish player to have either one or the other, but the Anglo-Egyptian player doesn't know which one until he stumbles onto it. Players are advised that the employment of both optionals in the same game is not recommended.

### §10.1 – River Mines

descriptive

manual page unknown

River Mines

The Khalifa twice tried (unsuccessfully) to submerge a powerful mine in the Nile to sink or damage British gunboats. This option assumes that both attempts were successful.

### §10.2 – River Chain

descriptive

manual page unknown

River Chain

The Khalifa also tried (also unsuccessfully) to string a heavy chain across the Nile to stop or slow down the British gunboats. This option assumes the chain was emplaced.

### §10.11 – Secretly record mine hexes

implemented

manual page unknown

Prior to the commencement of play the Dervish player secretly records two Nile River hexes to be mined (the mines may not both be placed in the same hex). These hexes must be south of the E–W hexrow in which the Khor Shambat empties into the Nile.

| File                                                                                                  | Symbol                  | Code Snippet                                                                                                                                                                                                                                                                                                                            |

## §10.12 – Mine resolution

implemented

manual page unknown

When a British gunboat enters a mined hex, the Dervish player must order it to stop as it has struck a mine. The Dervish player then resolves the effect of the mine's blast by rolling the ten-sided die:

- 1–4: No effect
- 5–7: Gunboat damaged, lost use of its engines and must drift two hexes per turn (with the current) for the rest of the game. No effect on guns or Maxims unless they drift out of range.
- 8–10: Gunboat sunk!

| File                                                                                                    | Symbol                  | Code Snippet                                                                                                                                                                                                      |

## §10.14 – Dervish gunboats pass safely

implemented

manual page unknown

The Dervish player’s gunboats may pass through the mined hexes with no ill effect (he knows where the mines are).

| File                                                                                  | Symbol                  | Code Snippet                                                                                                                                                                    |

## §10.21 – Secretly record chain hexes

implemented

manual page unknown

Prior to the commencement of play the Dervish player secretly records a line of river hexes (not exceeding four hexes long) across which the chain is strung. The hexes must be south of the E–W hexrow in which the Khor Shambat empties into the Nile.

| File                                                                                              | Symbol                   | Code Snippet                                                                                                                                                                                                                                                                                                                                                                                          |

Covered by tests: `omdurman-rules::src::effects::tests::chain_stops_gunboat_until_sunk`

§10.23 – Sinking the chain

implemented

manual page unknown

No gunboats (British or Dervish) may cross the chain until it has been sunk by the British player. He may sink the chain by a) having an infantry or cavalry unit spend one complete turn on either riverbank adjacent to a “chained” river hex, or b) firing at the chain with artillery and achieving a 3 or more on the Combat Results Table.

| File                                                                                                  | Symbol                        | Code Snippet                                                                                                                                                                                                                                                                                                                                  |

## §11 – Historical Notes

### §11 – Historical Notes

descriptive

manual page unknown

#### Historical Notes

In 1881 Mohammed Ahmed Ibn Al-Sayid Abdullah, the son of an obscure carpenter in the hinterlands of the Sudan, proclaimed himself the “Mahdi” — the Messiah of the Islamic faith. His timing was propitious indeed. Since the early 1820’s a corrupt Egypt, with the Sultan of Turkey’s blessing, had incessantly raped the Sudan, taking ivory and flooding the slave markets with some half million captured Sudanese blacks. By 1880, nearly 40,000 Egyptian troops occupied outposts scattered throughout the Sudan, enforcing Egypt’s hold on this lucrative ivory and slave trade and squeezing the native population dry through vicious and corrupt tax officials. All was controlled from Khartoum via the office of Governor General of the Sudan. The title had been held by a succession of individuals, including General Charles Gordon, whose appointment was an attempt to reinstate some rudimentary justice in the Sudan after France and Britain assumed joint political control of a bankrupt Egypt.

By 1881, however, Gordon’s term had expired and a new Governor General, again corrupt and incompetent,
